

SECD
SCIENCE OF EARLY
CHILD DEVELOPMENT

 **RED RIVER
COLLEGE**

Are you looking for exciting tools
for professional development,
post-secondary teaching, staff
orientation and parent education?

With engaging content and hundreds of videos from around the world, the following online SECD resources are ideal for teaching and learning:

- **North American Edition** – A “living textbook” that provides an in-depth look at Brain Development, Coping and Competence, Communicating and Learning, the Ecology of Childhood, and Developmental Health. Each module includes an overview of concepts, research examples and links to practice.
- **Introductory Edition** – An abridged version of the North American Edition, shortened and simplified for those at an introductory level.
- **Child Development Primer** – A concise module with information on development theories, the study of child development, domains, milestones, observation, play and positive guidance.
- **Introduction au développement de l'enfant** – Cette introduction au développement de l'enfant est un document d'information traitant des théories et de l'étude du développement de l'enfant. Il explore les concepts essentiels liés au travail avec de jeunes enfants, notamment l'importance de l'observation, du jeu, et de l'orientation positive.
- **Prenatal Development Module** – This module explores the impact of the prenatal environment on fetal development and life-long health. It includes topics such as maternal health and nutrition, prenatal stress and social supports.

In Manitoba, access the SECD resources here: mb.scienceofecd.com

SECD
SCIENCE OF EARLY
CHILD DEVELOPMENT

 **RED RIVER
COLLEGE**

Vous êtes à la recherche
d'outils stimulants pour le
perfectionnement professionnel,
l'enseignement postsecondaire,
l'orientation du personnel et
